"Wenn nicht geschnitten oder ein den normalen Bedingungen fremder Stoff eingeführt oder ein Apparat vom Mechaniker angefertigt worden ist, so ist es in den Augen mancher Experimentatoren kein Experiment. Wogegen doch das Wesentliche des Experiments nur darin liegt, dass man sicher weiss, dass gewisse, sonst stets vorhandene Umstände in einem gegebenen Fall in bestimmter Weise abgeändert sind." BOVERI, *Zellenstudien*, vol. vi, p. 216.
